Specialty Guideline Management plerixafor-Mozobil

Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

| Brand Name | Generic Name |
|------------|--------------|
| Mozobil | plerixafor |

Indications

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-Approved Indications¹⁻²

Mozobil is indicated in combination with filgrastim to mobilize hematopoietic stem cells (HSCs) to the peripheral blood for collection and subsequent autologous transplantation in patients with non-Hodgkin's lymphoma or multiple myeloma.

Compendial Uses³⁻⁶

- Hematopoietic cell transplantation
- Gene therapy protocol

All other indications are considered experimental/investigational and not medically necessary.

Coverage Criteria

Hematopoietic Stem Cell Mobilization 1-6

Authorization of 6 months may be granted for mobilization of hematopoietic stem cells when both of the following criteria are met:

- The requested medication will be administered in any of the following scenarios:
 - After the member has received a G-CSF (e.g., filgrastim)
 - After the member has received chemo-mobilization
 - As part of gene therapy protocol
- The requested medication will not be used beyond 4 consecutive days or after completion of stem cell harvest/apheresis.

Continuation of Therapy

All members (including new members) requesting authorization for continuation of therapy must meet all requirements in the Coverage Criteria.
