POLICY

FDA-APPROVED INDICATIONS

Soma

Soma is indicated for the relief of discomfort associated with acute, painful musculoskeletal conditions in adults.

Limitations of Use

Soma should only be used for short periods (up to two or three weeks) because adequate evidence of effectiveness for more prolonged use has not been established and because acute, painful musculoskeletal conditions are generally of short duration.

Carisoprodol/aspirin/codeine phosphate

Carisoprodol/aspirin/codeine phosphate tablets are indicated for the relief of discomfort associated with acute, painful musculoskeletal conditions in adults.

Limitations of Use

Because of the risks of addiction, abuse, and misuse with opioids, even at recommended doses, reserve carisoprodol/aspirin/codeine phosphate tablets for use in patients for whom alternative treatment options (e.g., non-opioid analgesics):

- Have not been tolerated, or are not expected to be tolerated,
- Have not provided adequate analgesia, or are not expected to provide adequate analgesia

Carisoprodol/aspirin/codeine phosphate tablets should only be used for short periods (up to two or three weeks) because adequate evidence of effectiveness for more prolonged use has not been established and because acute, painful musculoskeletal conditions are generally of short duration.

INITIAL LIMIT QUANTITY

Limits should accumulate across all drugs and strengths up to highest quantity listed depending on the order the claims are processed. Accumulation does not apply if limit is coded for daily dose.
