Exceptions Criteria

Asthma

This document informs prescribers of preferred products and provides an exception process for targeted products through prior authorization.

These criteria were developed to align with the following: Standard Formulary Chart (SFC), Advanced Control Specialty Formulary Chart (ACSFC), and Value Formulary Chart (VFC).

Plan Design Summary

This program applies to the asthma products specified in this document. Coverage for targeted products is provided based on clinical circumstances that would exclude the use of the preferred products and may be based on previous use of a product. The coverage review process will ascertain situations where a clinical exception can be made. This program applies to all members requesting treatment with a targeted product.

Each referral is reviewed based on all utilization management (UM) programs implemented for the client.

Table. Asthma Products

Medications considered formulary or preferred on your plan may still require a clinical prior authorization review.

	Product(s)
Preferred	<ul style="list-style-type: none"> • Dupixent (dupilumab) • Fasenra (benralizumab) • Nucala (mepolizumab) • Xolair (omalizumab)
Target	<ul style="list-style-type: none"> • Cinqair (reslizumab) • Tezspire (tezepelumab-ekko)

Exception Criteria

This program applies to members requesting treatment for an indication that is FDA-approved for the preferred products.

Cinqair

Coverage for Cinqair is provided when the member has a documented inadequate response or intolerable adverse event with at least three of the preferred products.

Tezspire

Coverage for Tezspire is provided when either of the following criteria is met:

- Member meets all of the following:
 - Member has a documented inadequate response or intolerable adverse event with the preferred product Dupixent.
 - Member has either of the following:
 - Blood eosinophil count of at least 150 cells per microliter and has a documented inadequate response or intolerable adverse event with either of the preferred products, Fasenra or Nucala.
 - Blood eosinophil count of less than 150 cells per microliter.
 - Member has either of the following:
 - A pretreatment serum immunoglobulin E (IgE) level of at least 30 international units per milliliter (IU/mL) and has a documented inadequate response or intolerable adverse event with the preferred product Xolair.
 - A pretreatment serum IgE level of less than 30 IU/mL.
- Member has a documented inadequate response or intolerable adverse event with at least three of the preferred products.
