Medical Benefit: Advanced Biosimilars First	☐
Medical Benefit: Managed Medicaid (MMMB)	☐
Medicare Part B	☐
Medicare Part B: Advanced Biosimilars First	☐

Exceptions Criteria

Acromegaly Products

This document informs prescribers of preferred products and provides an exception process for targeted products through prior authorization.

These criteria were developed to align with the following: Marketplace Formulary (MF), Small Group Affordable Care Act (ACA) Aetna Health Exchange (AHE), and Aetna Individual Lives (IVL) Formulary.

Plan Design Summary

This program applies to the acromegaly products specified in this document. Coverage for a targeted product is provided based on clinical circumstances that would exclude the use of the preferred products and may be based on previous use of a product. The coverage review process will ascertain situations where a clinical exception can be made. This program applies to all members requesting treatment with a targeted product.

Each referral is reviewed based on all utilization management (UM) programs implemented for the client.

Table. Acromegaly Products

Medications considered formulary or preferred on your plan may still require a clinical prior authorization review.

	Products
Preferred	• Somatuline Depot (lanreotide) • Somavert (pegvisomant)
Targeted	• Bynfezia Pen (octreotide acetate) • Mycapssa (octreotide acetate delayed-release capsules) • octreotide acetate for injectable suspension • Sandostatin LAR (octreotide acetate for injectable suspension) • Signifor LAR (pasireotide)

Exception Criteria

This program applies to members requesting treatment for an indication that is FDA-approved for both of the preferred products.

Coverage for a targeted product is provided when the member has a documented inadequate response or intolerable adverse event with any of the preferred products.
