Exceptions Criteria CLL

This document informs prescribers of preferred products and provides an exception process for targeted products through prior authorization.

These criteria were developed to align with the following: Value Formulary (VF).

Plan Design Summary

This program applies to the chronic lymphocytic leukemia products specified in this document. Coverage for the targeted product is provided based on clinical circumstances that would exclude the use of the preferred products and may be based on previous use of a product. The coverage review process will ascertain situations where a clinical exception can be made. This program applies to members who are new to treatment with a targeted product for the first time.

Each referral is reviewed based on all utilization management (UM) programs implemented for the client.

Table. CLL Kinase Inhibitors

Medications considered formulary or preferred on your plan may still require a clinical prior authorization review.

	Products
	<ul style="list-style-type: none"> • Calquence (acalabrutinib) • Venclexta (venetoclax)
Target	<ul style="list-style-type: none"> • Copiktra (duvelisib) • Zydelig (idelalisib)

Exception Criteria

This program applies to members requesting treatment for an indication that is FDA-approved for the preferred products.

Coverage for the targeted product is provided when any of the following criteria is met:

- Member is currently receiving treatment with a targeted product, excluding when the requested targeted product is obtained as samples or via manufacturer’s patient assistance programs.
- Member has a documented inadequate response with two of the preferred products.
- Member has a documented intolerable adverse event with all of the preferred products.
