

Specialty Guideline Management

Coagadex

Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Coagadex	coagulation Factor X [human]

Indications

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-approved Indications¹

Coagadex is indicated in adults and children with hereditary Factor X deficiency for:

- Routine prophylaxis to reduce the frequency of bleeding episodes.
- On-demand treatment and control of bleeding episodes.
- Perioperative management of bleeding in patients with mild, moderate, and severe hereditary Factor X deficiency.

All other indications are considered experimental/investigational and not medically necessary.

Prescriber Specialties

Must be prescribed by or in consultation with a hematologist.

Reference number(s)
1942-A

Coverage Criteria

Hereditary Factor X Deficiency¹⁻⁴

Authorization of 12 months may be granted for treatment of hereditary Factor X deficiency when used in either of the following settings:

- Prophylaxis to reduce the frequency of bleeding episodes
- On-demand treatment and control of bleeding episodes

Authorization of 1 month may be granted for perioperative management of bleeding in members with mild, moderate, or severe hereditary Factor X deficiency.

Continuation of Therapy

Perioperative Management of Bleeding

All members (including new members) requesting authorization for continuation of therapy must meet all initial authorization criteria.

All Other Indications

Authorization of 12 months may be granted for continued treatment in members requesting reauthorization for an indication listed in the coverage criteria section when the member is experiencing benefit from therapy (e.g., reduced frequency or severity of bleeds).
