

Specialty Guideline Management

Bizengri

Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Bizengri	zenocutuzumab-zbco

Indications

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-Approved Indications¹

- Adults with advanced unresectable or metastatic non-small cell lung cancer (NSCLC) harboring a neuregulin 1 (NRG1) gene fusion with disease progression on or after prior systemic therapy.
- Adults with advanced unresectable or metastatic pancreatic adenocarcinoma harboring a NRG1 gene fusion with disease progression on or after prior systemic therapy.

Compendial Uses²

- Recurrent NSCLC
- Recurrent Pancreatic Adenocarcinoma
- Biliary Tract Cancers

All other indications are considered experimental/investigational and not medically necessary.

Documentation

Submission of the following information is necessary to initiate the prior authorization review: neuregulin 1 (NRG1) gene fusion status.

Coverage Criteria

Non-Small Cell Lung Cancer (NSCLC)^{1,2}

Authorization of 12 months may be granted for treatment of advanced unresectable, metastatic, or recurrent NSCLC when all of the following criteria are met:

- Member has experienced disease progression on or after prior systemic therapy.
- Member has neuregulin 1 (NRG1) gene fusion positive disease.
- The requested medication will be used as a single agent.

Pancreatic Adenocarcinoma^{1,2}

Authorization of 12 months may be granted for treatment of advanced unresectable, metastatic, or recurrent pancreatic adenocarcinoma when all of the following criteria are met:

- Member has experienced disease progression on or after prior systemic therapy.
- Member has neuregulin 1 (NRG1) gene fusion positive disease.
- The requested medication will be used as a single agent.

Biliary Tract Cancers²

Authorization of 12 months may be granted for treatment of unresectable, gross residual (R2), or metastatic biliary tract cancer (including intrahepatic and extrahepatic cholangiocarcinoma) when all of the following criteria are met:

- Member has experienced disease progression on or after prior systemic therapy.
- Member has neuregulin 1 (NRG1) gene fusion positive disease.
- The requested medication will be used as a single agent.

Continuation of Therapy

Authorization of 12 months may be granted for continued treatment in members requesting reauthorization for an indication listed in the coverage criteria section when there is no evidence of unacceptable toxicity or disease progression while on the current regimen.
