Specialty Guideline Management Lumakras

Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Lumakras	sotorasib

Indications

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-Approved Indications¹

Lumakras is indicated for the treatment of adult patients with KRAS G12C-mutated locally advanced or metastatic non-small cell lung cancer (NSCLC), as determined by an FDA-approved test, who have received at least one prior systemic therapy.

Lumakras, in combination with panitumumab, is indicated for the treatment of adult patients with KRAS G12C-mutated metastatic colorectal cancer (mCRC), as determined by an FDA-approved test, who have received prior fluoropyrimidine-, oxaliplatin- and irinotecan-based chemotherapy

Compendial Uses²⁻⁴

- Recurrent, advanced, or metastatic KRAS G12C-mutated NSCLC
- Pancreatic adenocarcinoma
- Colorectal cancer
- Ampullary adenocarcinoma

Small bowel adenocarcinoma

All other indications are considered experimental/investigational and not medically necessary.

Documentation

Submission of the following information is necessary to initiate the prior authorization review: Documentation of the presence of KRAS G12C mutation in tumor or plasma specimens.

Coverage Criteria

Non-Small Cell Lung Cancer (NSCLC)1,2

Authorization of 12 months may be granted for treatment of KRAS G12C-mutated recurrent, advanced or metastatic NSCLC in members who have received at least one prior systemic therapy, as a single agent.

Pancreatic Adenocarcinoma²

Authorization of 12 months may be granted for treatment of recurrent, locally advanced or metastatic pancreatic adenocarcinoma when all of the following criteria are met:

- The tumor or plasma specimen is positive for the KRAS G12C mutation.
- The member has an ECOG (Eastern Cooperative Oncology Group) performance status of 0-2
- The requested medication will be used as a single agent

Colorectal Cancer¹⁻⁴

Authorization of 12 months may be granted for treatment of advanced or metastatic colorectal cancer, including appendiceal adenocarcinoma and anal adenocarcinoma, when all of the following criteria are met:

- The tumor or plasma specimen is positive for the KRAS G12C mutation.
- The requested medication will be used as a single agent, or in combination with cetuximab (Erbitux) or panitumumab (Vectibix).
- The member previously received treatment with chemotherapy.

Ampullary Adenocarcinoma²

Authorization of 12 months may be granted for treatment of progressive ampullary adenocarcinoma when all of the following criteria are met:

The tumor or plasma specimen is positive for the KRAS G12C mutation.

The requested medication will be used as a single agent.

Small Bowel Adenocarcinoma²

Authorization of 12 months may be granted for subsequent treatment of advanced or metastatic small bowel adenocarcinoma when all of the following criteria are met:

- The tumor or plasma specimen is positive for the KRAS G12C mutation.
- The requested medication will be used as a single agent.

Continuation of Therapy

Authorization of 12 months may be granted for continued treatment in members requesting reauthorization for an indication listed in the coverage criteria section when there is no evidence of unacceptable toxicity or disease progression while on the current regimen.
