# Specialty Guideline Management Valchlor

# **Products Referenced by this Document**

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Valchlor	mechlorethamine gel

#### **Indications**

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

#### FDA-Approved Indications<sup>1</sup>

Valchlor is indicated for the topical treatment of Stage IA and IB mycosis fungoides-type cutaneous T-cell lymphoma in patients who have received prior skin-directed therapy.

## Compendial Uses<sup>2</sup>

- Smoldering adult T-cell leukemia/lymphoma (ATLL)
- Mycosis fungoides/Sezary syndrome (MF/SS)
- Primary cutaneous B-cell lymphoma:
  - Primary cutaneous marginal zone lymphoma
  - Primary cutaneous follicle center lymphoma
- Lymphomatoid papulosis (LyP)
- Histiocytic Neoplasms
  - Langerhans Cell Histiocytosis

All other indications are considered experimental/investigational and not medically necessary.
