Enhanced Specialty Guideline Management Treatment of Atopic Dermatitis Rinvoq

Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Rinvoq	upadacitinib

Indications

This program applies to Rinvoq for the treatment of atopic dermatitis. For indications other than atopic dermatitis, refer to the Specialty Guideline Management program for Rinvoq. Coverage will be provided if all the approval criteria are met and the member has no exclusions to the prescribed therapy.

Documentation

Submission of the following information is necessary to initiate the prior authorization review:

Initial requests

 Member's chart notes or medical records showing affected area(s) and affected body surface area (where applicable).

Atopic Dermatitis Enhanced SGM Rinvoq 5522-A P2024a_R.docx

Member's chart notes or medical record documentation and claims history of prerequisite
therapies (including topical calcineurin inhibitors, topical corticosteroids, or biologics/targeted
synthetic drugs) including dosage, duration, and response to therapy. If prerequisite therapy is
not advisable, documentation of why topical corticosteroid, topical calcineurin inhibitor, and/or
systemic drug product is/are not advisable for the member.

Continuation requests

Documentation (e.g., chart notes) that the member has experienced a positive clinical response to therapy as evidenced by low disease activity or improvement in signs or symptoms of atopic dermatitis.

Prescriber Specialties

This medication must be prescribed by or in consultation with a dermatologist or allergist/immunologist.

Coverage Criteria

Authorization of 4 months may be granted for members 12 years of age or older for treatment of moderate-to-severe atopic dermatitis when the member has had an inadequate response or intolerance to at least one biologic (e.g., Dupixent, Adbry) or a targeted synthetic drug (e.g., Cibinqo) in the past 180 days.

Authorization of 4 months may be granted for treatment of moderate-to-severe atopic dermatitis in members 12 years of age or older when all of the following criteria are met:¹⁻⁵

- Affected body surface is greater than or equal to 10% body surface area OR crucial body areas (e.g., hands, feet, face, neck, scalp, genitals/groin, intertriginous areas) are affected.
- Member meets either of the following:
 - Member has had an inadequate treatment response with either of the following in the past 180 days:
 - A high potency or super-high potency topical corticosteroid (see Appendix)
 - A topical calcineurin inhibitor
 - The use of high potency or super-high potency topical corticosteroid and topical calcineurin inhibitor are not advisable for the member (e.g., due to contraindications, prior intolerances, potency not appropriate for member's age).
- Member has had an inadequate response to treatment with a systemic drug product (e.g., oral
 cyclosporine, azathioprine, methotrexate, mycophenolate mofetil) indicated for the treatment
 of atopic dermatitis, or use of these therapies are not advisable for the member.

Continuation of Therapy

Authorization of 12 months may be granted for all members 12 years of age or older (including new members) who are using the requested medication for moderate-to-severe atopic dermatitis and who achieve or maintain a positive clinical response as evidenced by low disease activity (i.e., clear or almost clear skin), or improvement in signs and symptoms of atopic dermatitis (e.g., redness, itching, oozing/crusting).

Other^{1,6}

Member has had a documented negative tuberculosis (TB) test (which can include a tuberculosis skin test [TST] or an interferon-release assay [IGRA]) within 6 months of initiating therapy for persons who are naïve to biologic drugs or targeted synthetic drugs associated with an increased risk of TB.

If the screening testing for TB is positive, there must be further testing to confirm there is no active disease (e.g., chest x-ray). Do not administer the requested medication to members with active TB infection. If there is latent disease, TB treatment must be started before initiation of the requested medication.

Member cannot use the requested medication concomitantly with any other biologic drug, targeted synthetic drug, or potent immunosuppressant such as azathioprine or cyclosporine.

Appendix

Table. Relative potency of select topical corticosteroid products⁷

Potency	Drug	Dosage form	Strength
I. Super-high potency (group 1)	Augmented betamethasone dipropionate	Ointment, Lotion, Gel	0.05%
I. Super-high potency (group 1)	Clobetasol propionate	Cream, Gel, Ointment, Solution, Cream (emollient), Lotion, Shampoo, Foam, Spray	0.05%
I. Super-high potency (group 1)	Fluocinonide	Cream	0.1%
I. Super-high potency (group 1)	Flurandrenolide	Tape	4 mcg/cm ²
I. Super-high potency (group 1)	Halobetasol propionate	Cream, Lotion, Ointment, Foam	0.05%
II. High potency (group 2)	Amcinonide	Ointment	0.1%
