Enhanced Specialty Guideline Management Ebglyss

Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Ebglyss	lebrikizumab-lbkz

Indications

This program applies to Ebglyss for the treatment of atopic dermatitis. For indications other than atopic dermatitis, refer to the Specialty Guideline Management program for Ebglyss. Coverage will be provided if all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-approved Indication for atopic dermatitis

Ebglyss is indicated for the treatment of adults and pediatric patients aged 12 years of age and older who weigh at least 40 kg with moderate-to-severe atopic dermatitis whose disease is not adequately controlled with topical prescription therapies or when those therapies are not advisable. Ebglyss can be used with or without topical corticosteroids.

All other indications are considered experimental/investigational and not medically necessary.

Documentation

Submission of the following information is necessary to initiate the prior authorization review:

Atopic Dermatitis Enhanced SGM Ebglyss 6646-A P2024_R.docx

© 2024 CVS Caremark. All rights reserved.

Initial requests:

- Chart notes or medical records showing affected area(s) and body surface area (where applicable).
- Chart notes or medical record documentation and claims history of prerequisite therapies
 (including topical calcineurin inhibitors, topical corticosteroids, or biologics/targeted synthetic
 drugs) including dosage, duration, and response to therapy. If prerequisite therapy is not
 advisable, documentation of why topical corticosteroid and/or topical calcineurin inhibitor
 is/are not advisable for the member.

Continuation requests:

Documentation (e.g., chart notes) that the member has experienced a positive clinical response
to therapy as evidenced by low disease activity or improvement in signs or symptoms of atopic
dermatitis.

Prescriber Specialties

This medication must be prescribed by or in consultation with a dermatologist or allergist/immunologist.

Coverage Criteria

Atopic dermatitis

Authorization of 4 months may be granted for members 12 years of age or older weighing at least 40 kg who have previously received a biologic (e.g., Dupixent) or targeted synthetic drug (e.g., Cibinqo, Rinvoq) indicated for moderate-to-severe atopic dermatitis in the past 180 days.

Authorization of 4 months may be granted for members 12 years of age or older weighing at least 40 kg for treatment of moderate-to-severe atopic dermatitis when both of the following criteria are met:

- Affected body surface is greater than or equal to 10% body surface area OR crucial body areas (e.g., hands, feet, face, neck, scalp, genitals/groin, intertriginous areas) are affected.
- Member meets either of the following:
 - Member has had an inadequate treatment response with either of the following in the past 180 days:
 - A high potency or super-high potency topical corticosteroid (see Appendix)
 - A topical calcineurin inhibitor
 - The use of high potency or super-high potency topical corticosteroid and topical calcineurin inhibitor are not advisable for the member (e.g., due to contraindications, prior intolerances, potency not appropriate for member's age).

Continuation of Therapy

Authorization of 12 months may be granted for members 12 years of age or older (including new members) weighing at least 40 kg who are using the requested medication for moderate-to-severe atopic dermatitis when the member has achieved or maintained a positive clinical response as evidenced by low disease activity (i.e., clear or almost clear skin), or improvement in signs and symptoms of atopic dermatitis (e.g., redness, itching, oozing/crusting).

Other

Member cannot use the requested medication concomitantly with any other biologic drug or targeted synthetic drug for the same indication.

Dosage and Administration

Approvals may be subject to dosing limits in accordance with FDA-approved labeling, accepted compendia, and/or evidence-based practice guidelines.

Appendix

Table. Relative potency of select topical corticosteroid products

Potency	Drug	Dosage form	Strength
